

# PLARN

1. Smooth and fold the bag into 3 folds.
2. Cut the handles off the top.
3. Cut the folded bag into 1" sections, across the bag (see image).
4. Unfold each 1" section.
5. Tie the ends together by using a Girth Hitch (see image).
6. Once all ends are together, begin rolling the PLARN into a manageable size ball.
7. Continue with the remainder of your bags to make several balls of PLARN.

\* The number of bags needed will be determined by the project you wish to make. The yield of strips of PLARN from one bags also is determined by the width of the strips you cut.

### Girth Hitch:

1. Open ends of strips.
2. Lay one end over another.
3. Fold the strip that is under, over the top strip.
4. Pull through and it's tight.

Continue with all remaining bags.
