

3 in 1 Sewing Tool

Keep your pin cushion, snips and tape measure all in one handy place while you create!

Step 1.

Cut a small scrap of fabric into any shape desired.

Step 2.

Sew 1/4" seam or less around all edges and leave opening for stuffing and insertion of tape measure.

Step 3.

Stuff it full! Fill corners, and make sure it's packed. Use old scraps for the stuffing—*be green!*

All done! Hang around your neck while you sew or take custom measurements. So much easier to work with than searching for those snips or reaching for pins.

Step 5.

Fold a one inch end over the handle of your snips. Your fingers can still fit in just fine. Stitch firmly. **Glue does not work well with this project.*

Wishing you success & inspiration today and always! *Sher*
