

Quick Gathers

Sometimes you need to gather a large or thick amount of fabric and really, why spend so much time with the traditional method of sewing 2 rows of large stitches, then gather and pull and gather and pull....

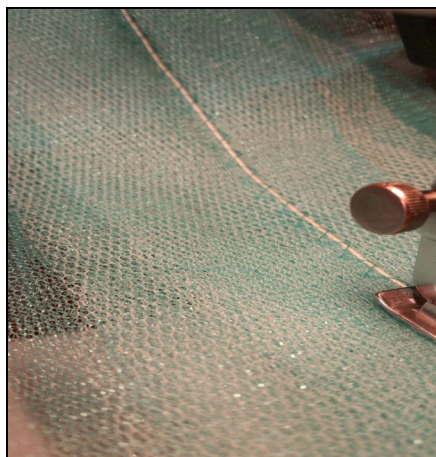

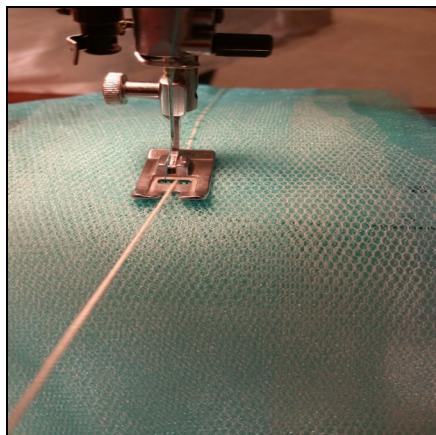

Follow this simple trick and you won't dread gathers any more!

- Crochet thread or thin cord
- Thread to match garment

Leaving a length for pulling, place crochet thread where you want the gather line.

Stitch with a large zig zag stitch over the cord.

You'll have the work finished with grace and style.
